

HanPrism Desktop Application Course

COURSE DESCRIPTION

This objective of this course is to learn how to use HanPrism desktop applications for accessing and analyzing your process data. This course will guide you on how to use mimics and various trend charts, export and retrieve real-time and historical process data to Microsoft® Excel. The course will also guide you on how to set up HanPrism Alarm set-points and use alarm functions. You will also learn how to install and set up HanPrism desktop applications including HanPrism Spotlight, HanAra Spreadsheet, and Alarm Management.

This course will take place over three (3) days. On the first day, you will learn all functions of HanPrism desktop applications; for the following days, you will have a practice session to actually utilize the functions covered during the previous day.

WHO SHOULD TAKE THIS COURSE?

This course is designed for novice HanPrism users and is open to anyone who wants to have core working knowledge of HanPrism desktop applications.

PREREQUISITES

In this course, you will learn the basics of the HanPrism system. This course will not cover subjects related to basic computer skills and Microsoft® Excel skills.
