

HanPrism

Advanced Graphic Design Course – Utilizing HanPrism Graphic Editor

COURSE DESCRIPTION

This objective of this course is to learn how to design and modify process graphics using the HanPrism Graphic Editor. This course will guide you on how to design objects and symbols and create process graphics. This course will also cover HanPrism engineering tools, which allow you to assign a large number of tags (points) on graphics.

This course will take place over three (3) days. On the first day, you will learn the functions of the HanPrism Graphic Editor; for the following two days, you will have practice time to actually utilize the functions covered during the previous day.

WHO SHOULD TAKE THIS COURSE?

This course is for HanPrism users, system managers, and engineers who want to design and modify their own process graphics by using the HanPrism Graphic Editor.

PREREQUISITES

In this course, you will learn how to use the HanPrism Graphic Editor. The suggested prerequisite skills include a working knowledge of the HanPrism applications and process graphics (mimics) including symbols and the symbol working process of your site.

COURSE TOPICS / CONTENTS

The course begins with an introduction to HanPrism and the HanPrism Graphic Editor. You will learn how to install and use the HanPrism Graphic Editor.

- Installing the HanPrism Graphic Editor
- Understanding all functions of the HanPrism Graphic Editor
- Designing objects and symbols and creating process graphics
- Adding/Modifying tags (points) on graphics and assigning tags with HanPrism engineering tools
- Viewing the designed graphics on HanPrism Spotlight
