

# HanPHI

## System Management Course

---

### COURSE DESCRIPTION

The objective of this course is to learn how to install, set up, manage, and use HanPHI including the Gateway, Data Manager, Proxy Server, DB Utility, and HanPHI Server. This course will guide you in setting up the Gateway, Proxy Server, and Data Manager to interface your data sources with HanPHI. Moreover, this course will cover how to make HanPHI Database and SuccessTree groups, how to use HanPHI Auto Update and Model Manager, and how to do system trouble shooting.

This course will take place over three (3) days. You will learn the functions of HanPHI and have a number of practice sessions to actually utilize the covered functions and features.

### WHO SHOULD TAKE THIS COURSE?

This course is designed for system managers, highly skilled users, and IT engineers of HanPHI.

### PREREQUISITES

In this course, you will learn the installation and management of HanPHI. This course will not cover basics of the HanPHI client programs. The suggested prerequisite skills include a working knowledge of HanPHI and a thorough understanding of the system and network configuration of your site.

### COURSE TOPICS / CONTENTS

The class starts with an introduction to the HanPHI system configuration and how to configure and manage the HanPHI.
