

HanPrism System Management Course

COURSE DESCRIPTION

The objective of this course is to learn how to install, set up, manage, and use HanPrism including the Gateway, Data Manager, Proxy Server, HanPrism Server, and HanPrism Spotlight. This course will guide you in how to set up the Gateway, Proxy Server, and Data Manager to interface your data sources with HanPrism. This course will also cover how to manage HanPrism servers, tags, and user accounts, and how to make mathematical expressions with HanPrism Script Tag.

This course will take place over five (5) days. During this time, you will learn the functions of HanPrism and have a number of practice sessions to actually utilize covered functions and features.

WHO SHOULD TAKE THIS COURSE?

This course is designed for system managers, highly skilled users, and IT engineers of HanPrism.

PREREQUISITES

In this course, you will learn about the installation and management of HanPrism. This course will not cover the basics of HanPrism applications. The suggested prerequisite skills include a working knowledge of HanPrism applications and a thorough understanding of the system and network configuration of your site. The Desktop Application course and Visualization course should be taken first.

COURSE TOPICS / CONTENTS

The course begins with an introduction to the HanPrism system configuration. This course will cover in-depth topics that help you configure and manage HanPrism.

- Installing and setting up the Gateway, Proxy Server, and HanPrism Server
- Managing HanPrism interface programs
- Making and editing the HanPrism database
- Using HanPrism engineering tools
- Making equations and mathematical expressions to process calculated variables
- Troubleshooting HanPrism
